North American Global Data Synchronization Network Policy

To ensure that we and our customers have access to complete and accurate data about items in our supply chain, Gordon Food Service has chosen to participate in the Global Data Synchronization Network (GDSN.) Utilizing the GDSN improves supply chain efficiencies and data quality, enhances merchandising and promotional strategies, promotes food safety and supports a highly satisfying customer experience.

GDSN for Gordon Food Service US

Gordon Food Service US subscribes to [Syndigo](#). All suppliers are expected to hold a valid company prefix provided by GS1 and have all products that are not customer-proprietary published to Gordon Food Service US, Global Location Number (GLN) 0093901000002, through a GDSN-certified data pool. Published items must have complete and accurate product information including core, marketing, nutrition, allergens (commonly referred to as Phase 1 and Phase 2 attributes) and images. Our detailed GDSN implementation guide is attached to this policy as Exhibit A.

GDSN for Gordon Food Service Canada

Gordon Food Service Canada subscribes to ECCnet, the GDSN data pool provided by [GS1 Canada](#). All vendors are expected to publish through ECCnet to Gordon Food Service Canada, GLN 0620868000013 all available items that are not customer-proprietary. These items must include core, marketing, nutrition, and allergen information, and be certified as FS3 compliant.

Exhibit A

Gordon Food Service

GDSN Implementation Guide

Version 2.3
March 2025

OVERVIEW

This document is intended for Suppliers who will be sending product data to Gordon Food Service through the GDSN and have subscribed to a GDSN Certified Data Pool other than Syndigo.

Suppliers currently publishing item information through the Global Data Synchronization Network (GDSN) for their Retail Trading Partners will need to populate additional Food Service data attributes such as Core, Marketing, and Nutrition, as well as Hazmat and Images to meet the Gordon Food Service requirements.

The following options are available:

Option 1: GDSN – Provide all data attributes via GDSN

Option 2: GDSN Plus – Provide additional attributes to Syndigo directly

All communication related to the Gordon Food Service implementation should be directed to Syndigo. Your Syndigo contact will review the options available to you and recommend the option which best suits your company's needs.

Syndigo Contacts

1. For Suppliers who have an existing relationship with Syndigo, contact your assigned Syndigo Account Executive. Contact Amanda Ziehme, Customer Success Manager, Amanda.Ziehme@syndigo.com or 615.234.3844.
2. If you work with another GDSN Certified Data Pool, then navigate to the Syndigo support form at <https://www.syndigo.com/support/gdsn-en/> and choose "GDSN, GDSN Healthcare Data, or GDSN Subscription Requests" as the request type. For Suppliers who do not have an existing relationship with Syndigo and have questions, contact Amanda Ziehme, Customer Success Manager, Amanda.Ziehme@syndigo.com or 615.234.3844.

Gordon Food Service GLN Information

Gordon Food Service Production GLN: 0093901000002

If you would like to reach out to Gordon Food Service directly, please contact the Gordon Food Service GDSN team at GDSN@GFS.com.

Gordon Food Service Data Synchronization Environment

Data Pool: Syndigo
System: Syndigo

Option 1 : Publishing to Gordon Food Service via GDSN

Publications

1. Gordon Food Service requires Suppliers publish **all** products they would like to make available for sale to Gordon Food Service:
 - a. Items Gordon Food Service currently purchases.
 - b. Items that the Supplier could sell to Gordon Food Service in the future. Please note that the Supplier will be subject to product setup administration fees on any new non-proprietary items not loaded and published at the time of new item listing or Gordon Food Service may choose not to list the new item.

For the first publication, Suppliers are to publish all products as “Initial Load”.

Implementation Steps

1. Initiate the GDSN trading partner relationship.
 - a. To confirm your implementation, navigate to the Syndigo support form at <https://www.syndigo.com/support/gdsn-en/> and choose "GDSN, GDSN Healthcare Date, or GDSN Subscription Requests" as the request type.
 - b. Review the list of required attributes in this document
 - c. Gordon Food Service will create a subscription based upon your GLN
2. Prepare product data for Publication.
3. Publish all products as “Initial Load.”
4. Investigate and respond to “Review” CIC responses. For questions or clarifications, navigate to the Syndigo support form at <https://www.syndigo.com/support/gdsn-en/>
5. Ongoing publications should be sent with “New” or “Update” status. To remove a product, send as “Delete”. (There are GS1 guidelines on how to discontinue/inactivate a product which should include setting a Discontinue Date first, then when all of the product is out of the supply chain, do a pub delete.)

Catalog Item Confirmations (CIC's)

Gordon Food Service will automatically return a CIC response message via GDSN to the Supplier. The CIC sent will be based upon the following:

GDSN Response Messages:

Accepted: Transmission received and can be processed.

Exception: Transmission received but contains XML or GDSN validation error - will not be processed.

CIC Messages:

Received: Product has been received and passed Gordon Food Service GDSN validations. This response will typically be sent within a few hours after receiving the publication.

Review: Product does not pass Gordon Food Service GDSN validations or product has failed Gordon Food Service's audit process and therefore has data discrepancies to be reviewed and addressed. Reason for Review status will be transmitted in CIC999. This response may follow an Accepted message and may take several days to resolve.

Synchronized: Product has been fully accepted and loaded into the Gordon Food Service internal system and will be updated as revisions occur. This response will be sent after all validations and audits have been successfully completed.

Rejected: Product has been de-listed by Gordon Food Service. The item will revert back to Eligible with an Accepted CIC status (if passing audit) or Review CIC status (if failing audit) the following week. If required, item can be published to Syndigo as a delete following the Accepted or Review CIC status.

Option 2: GDSN Plus – Providing Additional Attributes to Syndigo

Your Syndigo contact will walk you through the various implementation options available to your company with this method.

Required Gordon Food Service Product Attributes

Gordon Food Service requires Suppliers to publish and pass audit on all items, including any proprietary-labeled items for which they have explicit customer authorization. The attributes have been broken into subsets: Core, Marketing, Nutrition and Hazmat. Each subset of data has minimum requirements for publication. If you have any questions on Nutrition Attributes, contact Nutrition Resource Center nrc@gfs.com or (800) 968-4426.

Images published according to the GS1 Foodservice standard, as prescribed in the [Product Images Application Guideline document](#) are a business requirement. Additionally, specific types of images are required based on product category, as documented in Gordon Food Service's [eCommerce Photography Standards document](#). If you have already provided Gordon Food Service with product images, you DO NOT need to provide new ones. If you are unable to publish images that meet GS1 standards, Syndigo is the preferred Image and Data Quality service provider. Contact Amanda Ziehme, Customer Success Manager, Amanda.Ziehme@syndigo.com for more information.

Legend		
M = Mandatory Minimum subset of attributes that are required in order for Gordon Food Service to receive publication. Attributes in Bold are changes from the prior Implementation Guide version.	R = Additional attributes Requested by Gordon Food Service to fulfill the complete data requirements. These are not required for publications	C = Conditional

Core:

Attribute s #	GDSN Common Name	Unique Field Name	Global Data Dictionary Tag	Minimum Required For Publication	Notes
1	Brand Name	Brand Name	brandName	M	Brand Names should be provided using Proper Case (not all upper case) and should not contain special characters or registered trademark symbols
2		Sub Brand	subBrand	R	
3	Private Label/Restricted Distribution	Brand Distribution Type	brandDistributionTypeCode	R	If provided value is RESTRICTED_DISTRIBUTION product passes image validations
4	GTIN	GTIN	gtin	M	
5	Bar Code / Data Carrier	GS1 Trade Item Identification Key Code (UPC)	gs1TradeItemIdentificationKeyCode	M
